Longevity

Add Value to Every Circle of Life

Reflex^{PLUS} Longevity

The Peak of Science and Exclusivity

Every life is a journey. Western culture views this journey as a linear progression, unfolding from start to finish. Eastern culture, on the other hand, defines the same journey in cycles; every ending is, in truth, a new beginning.

Longevity brings these two perspectives into harmony. With circles that symbolize every stage of life, it focuses on living better, healthier, and more harmoniously.

Reflex Plus Longevity reflects this philosophy in the lives of our beloved companions. Energy and growth in puppyhood, vitality in youth, endurance in adulthood, protection in senior years... Each stage adds a new ring to the circle of life.

Longevity embraces all these circles with specialized formulas for each, aiming not only to extend life but to enhance its quality at every stage. Built upon the perfect balance of the golden ratio, this approach supports every phase of our companions' lives at the summit of science and exclusivity.

“Supreme Balance” icon, inspired by the golden ratio, comes to life in the union of cat and dog tails. It symbolizes perfect harmony and peace.

It also makes visible the complementary bond between pets and their owners.

- Youth & Energy: Supports the power of youth.**
- Maturity & Balance: Helps maintain health and resilience.**
- Seniority & Protection: Contributes to increased peace of mind.**
- Philosophy & Science: Beyond the circle of life, there is the Supreme.**

FOR LIFELONG HEALTH THE “LONGEVITY” APPROACH

In pet health, the “**longevity**” approach is a holistic philosophy that aims not only to extend lifespan but also to enhance quality of life at every stage.

At the heart of the **longevity** philosophy lies nutrition. Because the right macro and micronutrients, antioxidants, functional components, and balanced energy sources are critical for helping our furry friends maintain a healthy life journey.

In the puppy and youth stages, organ development, immune system formation, and metabolic adaptations are supported;

In adulthood, functional components help control inflammation and maintain muscle and organ health;

In senior years, high-quality proteins, digestible fibers, and rich antioxidants support both physical and cognitive well-being.

Thanks to nutrition strategies specially developed for each life stage, it is possible to improve the quality of life of our cats and dogs and help them live longer, healthier lives.

The **Longevity** product family offers scientific solutions for every period of our furry friends' lives. Because for us, health is a lifelong journey.
